

Sunny glove 18ESD Gloves  
2019-09-22

In order to provide customers with more comfortable wearing experience, as well as to meet the customer refined production requirements for gloves. Rudong Sunny gloves co.,Ltd has recently successfully developed 18G ESD gloves.

The 18G glove is significantly thinner than the 13G glove, more like a layer of skin on a worker's hand what allows the fingers to manipulate the delicate production process more flexibly.
